Name: Leif Martin
Chapter #11

1. Can data in memory be called a file? Explain.
    a. No, when a computer is turned off, data that's stored in memory will be lost, while data in a file is stored.
2. Write the *import* statement required to access the File Class in an application.
    a. import java.io.*;
3. Identify the error in the following statement:
    a. File textFile = new File("c:\inventory.txt");
        i. Should have 2 \ - > File textFile = new File("c:\\inventory.txt");
4.
    a. Which statement is used to write an exception handler?
        i. try-catch
    b. Write an exception handler to handle an IOException if a specified file name cannot be used to create a file. The exception handler should display the appropriate messages to the user.
        i. try { // Code block
        } catch (IOException e) {
        System.err.println("Error: The specified file name could not be used to create the file."); System.err.println("Details: " + e.getMessage());
        }
5.
    a. What is the name of the stream used for displaying error messages?
        i. System.err
    b. Where are these messages displayed?
        i. The are displayed in the console
6.
    a. What does the file stream keep track of?
        i. The current position in the file as it reads through sequentially
    b. What characters together make up a line in terminator?
        i. \r\n
7. What two classes are used together to write data to a file?
        i. FileWriter & BufferedWriter
8. Write a statement to convert account balances that have been read from a text file to a *double* value and add them to *totalbalance*.
    a. double totalBalance += Double.parseDouble(readFile.readLine());
9. Explain the difference between object serialization and object deserialization
    a. Serialization saves the current object state to the file while object deserialization takes the data in the file and uses it to copy the object
10. What interface must be implemented if objects of a class are to be written to a file?
    a. import java.io.Serializable
