

Credit Name: CSE3010

Assignment Name: BreakAPlate

The following questions can help you in thinking critically about your problem-solving processes:

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

- The wording of the task was really confusing, I kept getting started and then needing to redo parts because I misunderstood what the textbook wanted.

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding? How did you decide on the tools, data structures, or algorithms to use?

- I mostly did the program in one whole step rather than smaller parts

Implementation

Did you write the code in small pieces or attempt the entire solution at once? How did you test your solution along the way to make sure it was working?

- I mostly did the program in one whole step rather than smaller parts

Overcoming Challenges

What part of the problem was the most difficult for you? How did you handle moments when you felt stuck or unsure of what to do next?

- Understanding what the textbook was asking me to do, I felt like a lot of the wording was misleading

Learning

Was there anything you learned that you think will help you with future challenges?

- I learned how to use images in the window builder which aided in the other mastery's
